# 6 Day Precipitation Forecast

Valid Wednesday, January 18, 2017 – Monday, January 23, 2017.

# WEATHER SYNOPSIS BY REGION

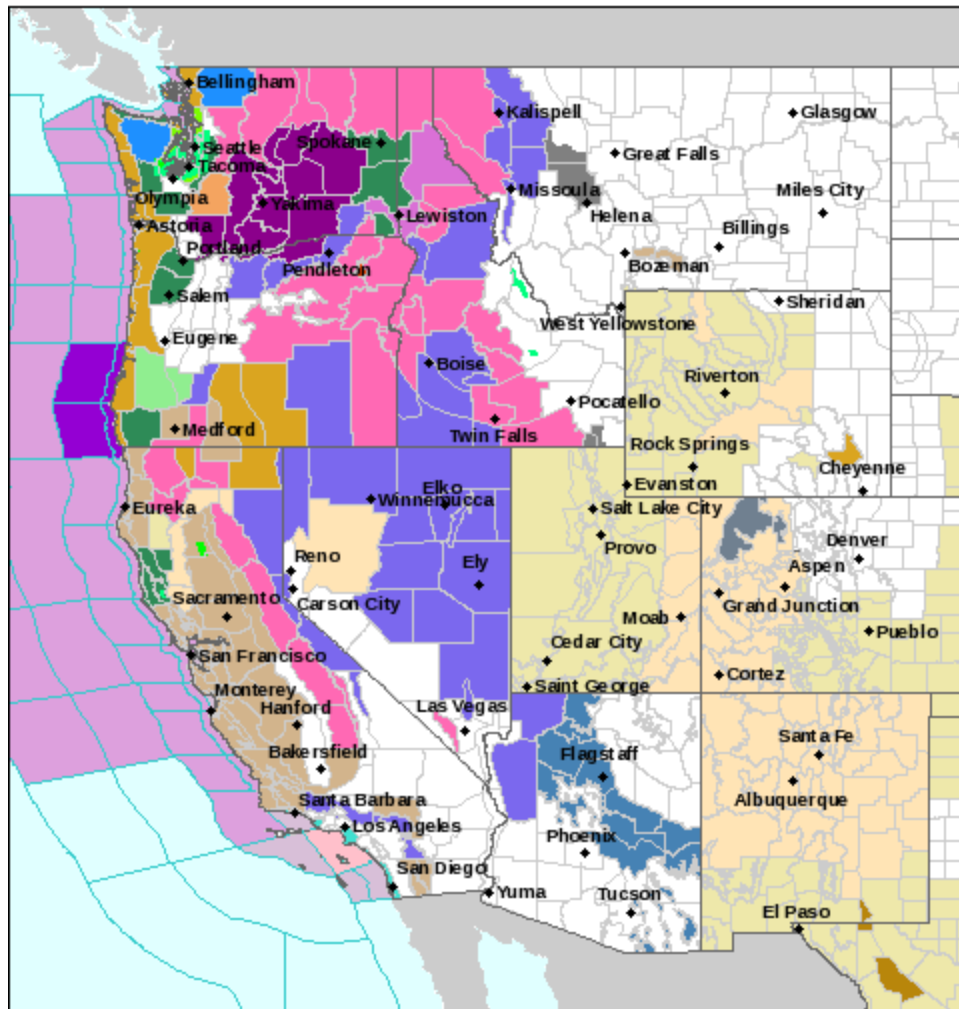

## **NORTHERN CALIFORNIA**

The first in a series of Pacific storms is moving through the region today. Southeast to southwest wind gusts of 40-50 mph are possible, along with moderate to heavy precipitation. Snow levels are near 5000 feet in the north and 7000 feet in the south, but they will drop by about 2000 feet tonight after the main cold front moves through. Scattered showers are expected with the colder air tomorrow. The next storm will arrive Friday with southerly gusts 30-40 mph and snow levels near 4000-5000 feet in moderate to heavy precipitations. Snow levels will drop Friday afternoon to 2500-4000 feet once the front moves through. Scattered showers will continue Saturday in the colder air mass. The third storm will move arrive early Sunday with moderate to heavy precipitation. Southerly gusts may reach 40-60 mph and snow levels will start out around 5000-7000 feet. Once the cold front moves through Sunday afternoon snow levels will drop to 3000-5000 feet Monday will be another day with scattered showers and snow levels near 2000-3000 feet. The problem of soft, saturated soils will continue to make downed trees possible. Area water courses will again run rather high as well. At this time it looks like next Tuesday will be the first in a stretch of a week to 10 days with dry and warmer weather and occasional offshore winds.

## **SOUTHERN CALIFORNIA**

Rain will be spreading from north to south today as a Pacific storm approaches the California Coast, with rain reaching the region by this evening. Periods of rain, heavy at times, will continue through Monday night as two additional Pacific storms affect the area. It still looks as though most foothill and mountain locations will receive between 6 and 12 inches of rainfall, with most coastal and valley locations receiving between 3 and 6 inches of rainfall through Monday. The snow level will be mainly between 4,000 and 5,000 feet. Periods of strong and gusty south to west winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes this afternoon through Monday night. Temperatures will be a little below normal today and then become well below normal tomorrow through Monday. Maximum temperatures will be in the 40s to low 50s across the mountains and mid 50s to mid 60s in the valleys today, and then cool to the mid 30s to mid 40s across the mountains and upper 40s and 50s in the valleys tomorrow through Monday. A ridge of high pressure will build into California from the Pacific Ocean bringing a slow warming and drying trend starting Tuesday.

# CAL OES LAW ENFORCEMENT MISSIONS

## Cal OES Law Missions

- **2017-LAW-29666** 1/17/17, 1453 hours, The Kern County Sheriff's Department requested assistance regarding a possible overdue aircraft out of Tehachapi. Originally it was thought the aircraft flew from Tehachapi to Torrance and then to Whiteman Airport in LA County last Wednesday but updated radar tracking and fuel receipts revealed the pilot returned to Tehachapi on Wednesday evening (1/11), refueled on Thursday morning (1/12) and departed Tehachapi for his daily flight to Torrance. It is not known if anyone else was on board. Radar tracks disappeared sometime after 0900 hrs on 1/12. Kern SO notified FAA which prompted the AFRCC to issue an alert notification (ALNOT) under mission number 17M0036A . The aircraft is a 1978 Mooney M20J, a fixed wing, single engine 4 seater, registered out of Topanga. The local police department checked the R/O's residence without success. Ramp checks had been done earlier at all 3 destination airports (Tehachapi, Torrance and Whiteman Airports) with negative results. The W/C issued a CLETS message to Kern, LA and San Bernardino Counties. The California Wing of the Civil Air Patrol was activated. They continue to search this morning. **Mission Ongoing.**
